How To Access Tax Information Using
Rowan County Website

Go to: www.rowancountync.gov

Click on 'Tax and Map GIS' at lower left-hand side of screen

Click on 'Tax Administration Record Search'

This next screen gives you several ways to perform a lookup:

- Owner's Name – last name then first name
- Property Address – give house # and road name only. Do not enter a direction, such as north, south, east or west and do not enter the road type, such as street, drive, road – the system will give you all the choices we have based on the house number and street name.
- Account # - most people will not know that
- Parcel ID – for example 500A232 or 001 001

Once you have performed the search, the system will bring up your choices for you to select from.

Click on the link under 'Owner' and it will bring up a data screen.

At the top of the data screen you can chose from any one of the 9 links depending what data you desire.

- For sales in subject property's neighborhood, click on the sales tab.

- To print a property record card that mirrors the tax card from our office, click on the link at the top of this page called 'tax card.'

- To view tax bills tied to this property, click on the link called 'Tax Bill.'

- To view the deed tied to this property, click on 'Deed.'

How to Calculate Property Taxes

Formula: Assessed Value divided by 100 times tax rate equals principal taxes.

128,190 divided by 100 x (County rate + Fire Dist or Municipal Rate) = Taxes
